

## On Hold Message Equipment

### The Message On Hold Equipment

The best way to imagine Go Go's on Hold Equipment is they're just like little radios that plug into your phone system with simple headphone jacks. That's it! Nothing complicated we made sure of that! At Go Go we have message on hold equipment that will suit every phone system in Australia. All our on hold message units have been specially designed for crystal clear quality sound, simple plug in installation and a "never break down" guarantee. At Go Go On Hold we provide all our equipment at no extra cost and it's so easy to use. We set - you forget. Our units are designed so we can deliver your new and updated hold messages with the click of a mouse. No fuss - super fast - super reliable. Message On Hold Production

What do we need you to do, to get your hold message up and running?...nothing! we do the lot. All we need from you is the kind of information you'd like in your on hold message then we script the message - record the voice overs - edit the message and then send it to you via email to approve. We'll too-n-fro your hold message until you get exactly what you want. A perfectly tailored message not only meeting, but exceeding, your expectations. From there we'll deliver your message on hold and all you have to do is plug it...just like you might a radio...power into the wall and simple little headphone jack into your phone system. It really is that simple. So leave it up to us all you have to do is liste too and enjoy your new On Hold Message from Go Go on Hold.
